

PVI-6.0-TL PVI-8.0-TL

GENERAL SPECIFICATIONS OUTDOOR MODELS

The non-isolated 6.0 and 8.0 kW three-phase inverters are the perfect solution for rooftop installations.

The smallest three-phase inverters in the Aurora family, they add to the range including the leading 10.0 and 12.5 kW transformerless inverters.

Two independent MPPTs, a wide input voltage range and high efficiency values permit to fit to different installation conditions, always ensuring maximum energy harvesting.

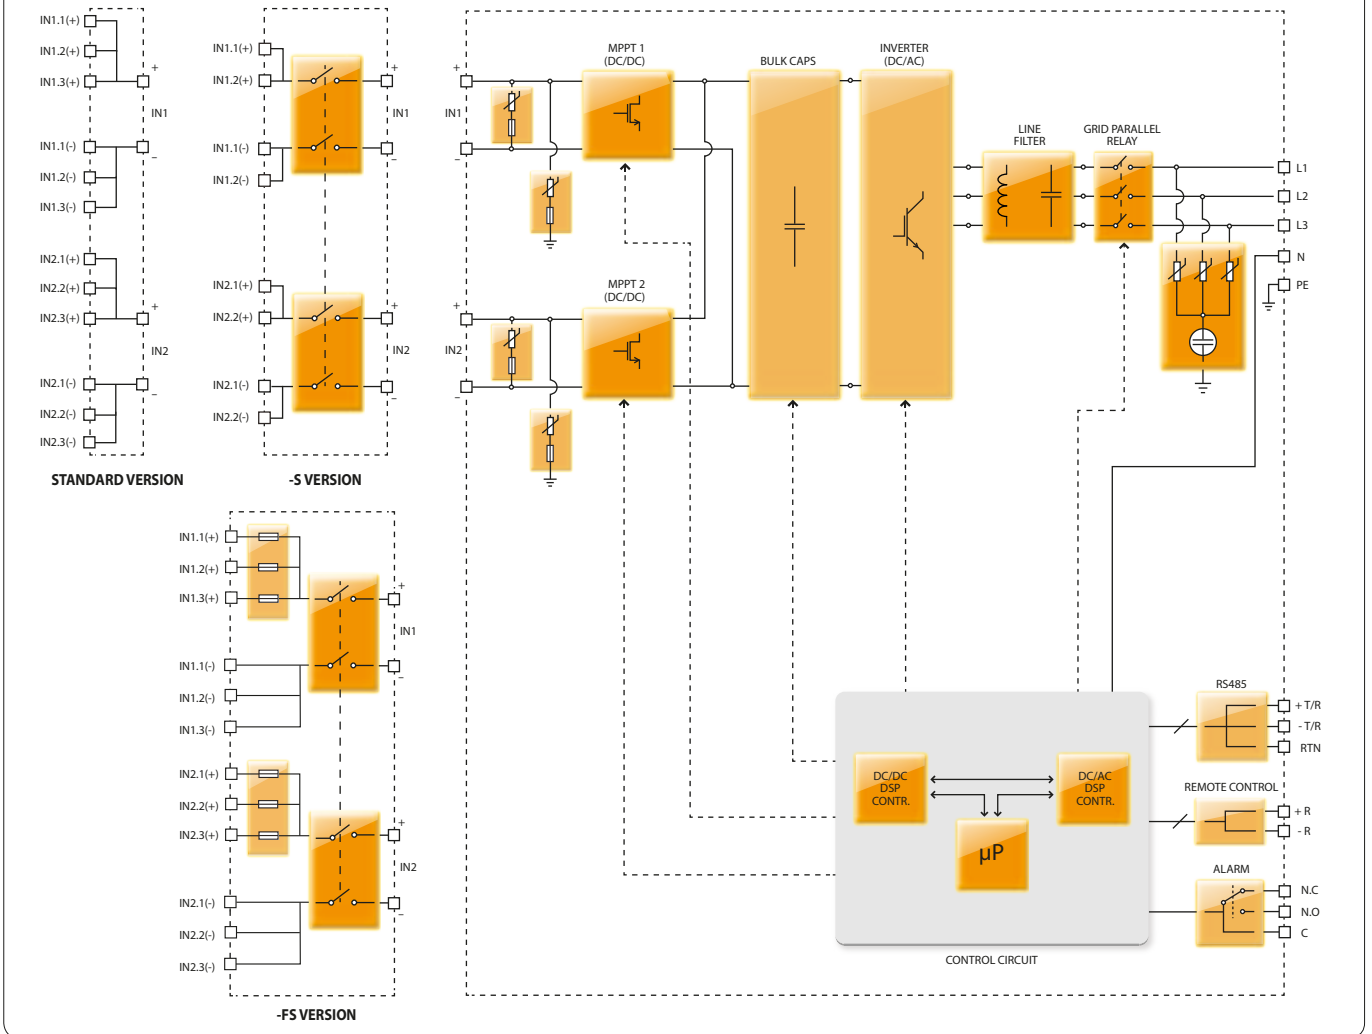

Also available in a version with a DC disconnect switch and protective fuses.

Features

- 'Electrolyte-free' power converter to further increase the life expectancy and long term reliability
- DC/AC conversion unit with three-phase bridge topology
- Each inverter is programmed to specific grid standards which may be selected directly in the field
- Dual input sections with independent MPP tracking, allows optimal energy harvesting from two sub-arrays oriented in different directions
- Wide input voltage range
- High speed and accurate MPPT algorithm for real time power tracking and improved energy harvesting
- Flat efficiency curves ensure high efficiency at all output levels ensuring consistent and stable performance over the entire input voltage and output power range
- Outdoor enclosure for unrestricted use under any environmental conditions
- Integrated DC disconnect switch in conformity with international standards (versions -S and -FS)
- RS-485 communication interface (for connection with laptop or datalogger)
- Compatible with PVI-RADIOMODULE for wireless communication with AURORA PVI-DESKTOP
